

Over 30 modular synthesizer designers trust **Metalphoto of Cincinnati** to create their custom panels.

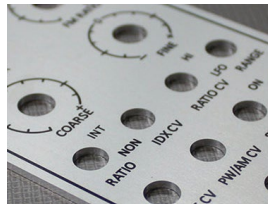

HIGH RESOLUTION/ DETAIL

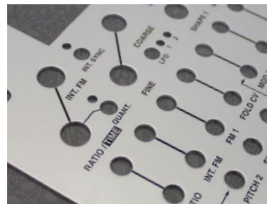

Our imaging processes have significantly greater resolution than screen printing or laser/chemical etching. Color and greyscale options available.

INDUSTRIAL DURABILITY

All images are printed beneath the anodized layer, providing unmatched durability and the smooth-to-the-touch feel of classic analogue electronic instruments.

ACCURATE FABRICATION

Computer Numerical Control (CNC) fabrication systems hold tolerances to $\pm 0.015"$ (0.381mm). Higher tolerances available.

Material Options:

- > 3U Eurorack and 5U panel heights are standard; custom sizes available.
- > 0.063" thickness is standard; 0.090" and 0.125" are also available.
- > Satin (mill) finish anodized aluminum is standard; matte and brushed available.
- > Blank panels available to fill empty case space.
